

Professional Summaries

AI-Oriented Full Stack Developer with expertise in **React.js, Node.js, MongoDB, and Python**, complemented by practical experience in **Generative AI and machine learning-based applications**. Developed and deployed intelligent systems including AI chatbots and recommendation engines with real-time streaming and secure authentication mechanisms. Proficient in integrating APIs, implementing role-based access control, and deploying scalable applications. Adept at combining AI capabilities with modern web technologies to build innovative, performance-driven solutions.

Work Experience

- Full Stack Developer Internship • EDU Tantr • Bangalore , India

May '25 – Jul '25

  - Contributed to development and maintenance of live web applications using **React.js, Express.js, and MongoDB**.
  - Collaborated with the development team to implement new features and fix bugs, enhancing application performance.
  - Created a MERN Stack-based e-commerce web app during internship, integrating Firebase Authentication and Firestore database, which reduced load time by 40% and enhanced user data synchronization.
- Python Programmer Internship • Besant Technologies • Chennai, India (Remote)

Oct '25 – Nov '25

  - Undergoing intensive training on **Python programming, object-oriented design, and application development** under professional mentorship.
  - Gaining hands-on experience with **core Python, OOP principles, APIs, and data structures** to build efficient and maintainable code.
  - Enhancing problem-solving and analytical skills by working on **real-world projects (Game Application: Rock, Paper, and Scissor)** under professional mentorship.
- Data Science Internship • Adroit Technologies • Chennai, India (Remote)

Dec '25 – Jan '26

  - Data Preprocessing & Cleaning:** Expertise in handling missing values, parsing JSON data, text normalization, and feature extraction from complex datasets (e.g., TMDb 5000 Movies Dataset).
  - Exploratory Data Analysis (EDA):** Proficient in using Python libraries (pandas, matplotlib, seaborn) to uncover patterns, visualize distributions, and derive actionable insights from data.
  - End-to-End Project Development:** Successfully led the complete lifecycle of a Movie Recommendation System—from problem definition and data collection to deployment.

Skills

**Front-End Frameworks:** JavaScript, HTML5, CSS3, React.js, TypeScript  
**Backend Technologies:** JSON, Firebase, Supabase Database, Render, MetaMask  
**Databases:** MySQL, MongoDB, SQL Queries, NoSQL  
**Tools & Version Control:** Antigravity, VS Code, Git, GitHub, Postman, vercel, Netlify  
**AI Tools:** Github Copilot, Claude, Lovable, ChatGPT, DeepSeek, Emergent, Gemini, Vercel  
**Languages:** Javascript, Python

Certifications

- Gen AI for Frontend Developer | Coursera

Oct '25
- MERN Stack Internship | EDU TANTR

Jun '25
- Python Internship | Besant Technologies

Nov '25
- Gen AI Powered Data Analytics | TATA Forage

Oct '25
- Introduction to MongoDB, AI, and Vector Search | ITC Academy/MongoDB

Aug '24
- MongoDB Atlas | MongoDB

Jul '24
- MongoDB and the Document Model | MongoDB

Jul '24
- Full Stack Developer | Simplilearn /Skillup

Jun '25
- Introduction to Front End Development | Simplilearn / Skillup

Jun '25
- Code Generation with Generative AI | Simplilearn /Skillup

Oct '25
- Introduction to MERN Stack | Simplilearn / Skillup

Jun '25
- Generative AI Mastermind | Outskill

Aug '25
- AI Foundation associate | ORACLE University

Jul '25

## Education

---

**Thiruvalluvar university vellore**, Tirupattur, India | Bachelor's Degree  
Computer Science

'23 – Present

- **Relevant coursework:** Data Structures, Web Development, Database Systems, Software Engineering, Prompt Engineering in Gen-AI
- **Final Year Project:** Designed and developed a **full-stack blockchain supply-chain platform** using React (Vite), Node.js/Express, MongoDB, and Solidity/Hardhat (**Polygon Amoy**), **enabling end-to-end textile batch traceability, secure verification, and trusted transfer tracking.**

## Projects

---

**Expense Tracker** | [Link](#)

Aug '25 – Oct '25

Personal Project

- **Built a full-stack Expense Tracker web app** using React, Tailwind, and Supabase to manage income, expenses, and budgets with secure authentication, CRUD operations, and offline-first support.
- **Integrated interactive dashboards and charts** for real-time spending insights, budget adherence, and monthly trend visualization, ensuring accuracy with validation, sanitization, and locale-aware currency/date handling.
- **Deployed to production with CI/CD pipelines**, optimizing performance through lazy loading, memoization, and efficient state management while ensuring reliability with unit and integration testing.

**Jarvis - AI Assistant** | [Link](#)

Oct '25 – Dec '25

Personal Project

- **Developed a full-stack AI chatbot application** using Python Flask and Google Gemini 2.5 API with real-time streaming responses, implementing user authentication (Flask-Login), SQL Alchemy database for chat history persistence, and RESTful API endpoints for seamless frontend-backend communication.
- **Built responsive web** interface with HTML/CSS/JavaScript featuring multiple chat modes, admin dashboard for user management, and dynamic UI components; deployed HTTP server with security headers (X-Frame-Options, XSS-Protection) and CORS configuration for cross-origin access.

**Textile Trace** | [Link](#)

Jan '26 – Mar '26

Academy

- Built **Textile Trace**, a full-stack blockchain supply-chain platform using **React (Vite), Node.js/Express, MongoDB, and Solidity/Hardhat (Polygon Amoy)** to provide end-to-end textile batch traceability.
- Developed secure backend architecture with **JWT auth, role-based access control, email verification, file upload + SHA-256 integrity checks, and 15+ REST APIs** for batch lifecycle, ownership transfer, trust features including Socket.io notifications, QR-based batch verification, and on-chain event/history tracking and verification workflows.

**The Vault | Cinematic Archive** | [Link](#)

Mar '26 – Present

Academy

- Created a **digital batch archive** and alumni-style directory website to showcase **profiles, memories, and group history** in a visually rich format.
- Enabled guestbook submissions and directory management through a **backend API and Firestore integration**, making the project **interactive and data-driven.**
