

Professional Summaries

Aspiring **Python Full Stack Developer** with expertise in **Python, React.js, JavaScript, Node.js, MySQL, and APIs**, complemented by hands-on experience in **Generative AI Tools, Data Science, and Data Analytics**. Skilled in developing scalable full-stack applications, integrating APIs, implementing secure authentication, and managing relational databases. Proficient in building AI-powered solutions, performing data cleaning, exploratory data analysis (EDA), SQL, predictive modeling, and creating interactive dashboards using Tableau, and Looker Studio. Passionate about leveraging software engineering, AI, and data-driven insights to build innovative, secure, and high-performance solutions.

Work Experience

- Full Stack Developer Internship • EDU Tantr • Bangalore , India

May '25 – Jul '25

 - Contributed to development and maintenance of live web applications using **React.js, Express.js, and MongoDB**.
 - Collaborated with the development team to implement new features and fix bugs, enhancing application performance.
 - Created a MERN Stack-based e-commerce web app during internship, integrating Firebase Authentication and Firestore database, which reduced load time by 40% and enhanced user data synchronization.
- Python Programmer Internship • Besant Technologies • Chennai, India (Remote)

Oct '25 – Nov '25

 - Undergoing intensive training on **Python programming, object-oriented design, and application development** under professional mentorship.
 - Gaining hands-on experience with **core Python, OOP principles, APIs, and data structures** to build efficient and maintainable code.
 - Enhancing problem-solving and analytical skills by working on **real-world projects (Game Application: Rock, Paper, and Scissor)** under professional mentorship.
- Data Science Internship • Adroit Technologies • Chennai, India (Remote)

Dec '25 – Jan '26

 - Data Preprocessing & Cleaning:** Expertise in handling missing values, parsing JSON data, text normalization, and feature extraction from complex datasets (e.g., **TMDB 5000 Movies Dataset**).
 - Exploratory Data Analysis (EDA):** Proficient in using **Python libraries (pandas, matplotlib, seaborn)** to uncover patterns, visualize distributions, and derive actionable insights from data.
 - End-to-End Project Development:** Successfully led the complete lifecycle of a Movie Recommendation System—from problem definition and data collection to deployment.
- Data Visualization Associate Internship • Excelrate • Gobar Internship (Remote)

Jul '26 – Present

 - Processed and analyzed **20,000+ records** from Opportunity and Learner datasets using **PostgreSQL and SQL**, ensuring data quality through cleaning, validation, and transformation.
 - Designed interactive **Looker Studio dashboards** with KPI cards and visualizations to monitor learner engagement, opportunity distribution, payment status, and cohort performance.
 - Collaborated in an Agile team environment to deliver end-to-end analytics solutions, present findings, and support data-driven decision-making through professional reports and presentations.

Skills

Front-End Frameworks: JavaScript, HTML5, CSS3, React.js, TypeScript
Backend Technologies: Python, JSON, Firebase, Supabase Database, Render, MetaMask
Databases: MySQL, MongoDB, SQL Queries, NoSQL
Tools & Version Control: Antigravity, VS Code, Git, GitHub, Postman, vercel, Netlify, Locker Studio
AI Tools: Github Copilot, Claude, Lovable, ChatGPT, DeepSeek, Emergent, Gemini, Vercel
Languages: Javascript, Python

Certifications

- Gen AI for Frontend Developer | Coursera

Oct '25
- MERN Stack Internship | EDU TANTR

Jun '25
- Python Internship | Besant Technologies

Nov '25
- Gen AI Powered Data Analytics | TATA Forage

Oct '25
- MongoDB and the Document Model | MongoDB

Jul '24

Education

Thiruvalluvar university vellore , Tirupattur , India | Bachelor's Degree '23 – '26
Computer Science

- **Relevant coursework:** Data Structures, Web Development, Database Systems, Software Engineering, Prompt Engineering in Gen-AI
- **Final Year Project:** Designed and developed a **full-stack blockchain supply-chain platform** using React (Vite), Node.js/Express, MongoDB, and Solidity/Hardhat (**Polygon Amoy**), **enabling end-to-end textile batch traceability, secure verification, and trusted transfer tracking.**

Projects

Expense Tracker | [Link](#) Aug '25 – Oct '25
Personal Project

- **Built a full-stack Expense Tracker web app** using React, Tailwind, and Supabase to manage income, expenses, and budgets with secure authentication, CRUD operations, and offline-first support.
- **Integrated interactive dashboards and charts** for real-time spending insights, budget adherence, and monthly trend visualization, ensuring accuracy with validation, sanitization, and locale-aware currency/date handling.
- **Deployed to production with CI/CD pipelines**, optimizing performance through lazy loading, memoization, and efficient state management while ensuring reliability with unit and integration testing.

Jarvis - AI Assistant | [Link](#) Oct '25 – Dec '25
Personal Project

- **Developed a full-stack AI chatbot application** using Python Flask and Google Gemini 2.5 API with real-time streaming responses, implementing user authentication (Flask-Login), SQL Alchemy database for chat history persistence, and RESTful API endpoints for seamless frontend-backend communication.
- **Built responsive web** interface with HTML/CSS/JavaScript featuring multiple chat modes, admin dashboard for user management, and dynamic UI components; deployed HTTP server with security headers (X-Frame-Options, XSS-Protection) and CORS configuration for cross-origin access.

Textile Trace | [Link](#) Jan '26 – Mar '26
Academy

- Built **Textile Trace**, a full-stack blockchain supply-chain platform using **React (Vite), Node.js/Express, MongoDB, and Solidity/Hardhat (Polygon Amoy)** to provide end-to-end textile batch traceability.
- Developed secure backend architecture with **JWT auth, role-based access control, email verification, file upload + SHA-256 integrity checks, and 15+ REST APIs** for batch lifecycle, ownership transfer, trust features including Socket.io notifications, QR-based batch verification, and on-chain event/history tracking and verification workflows.

The Vault | Cinematic Archive | [Link](#) Mar '26 – May '26
Academy

- Created a **digital batch archive** and alumni-style directory website to showcase **profiles, memories, and group history** in a visually rich format.
- Enabled guestbook submissions and directory management through a **backend API and Firestore integration**, making the project **interactive and data-driven.**
